Editorial

Vol. 3, No. 3 June 2025

Welcome to the inaugural edition of the *International Journal of Economic, Finance, and Business Statistics (IJEFBBS)*. In an era marked by rapid economic shifts and financial innovations, the need for rigorous analysis and statistical insights in economics, finance, and business has become more crucial than ever. This journal aims to bridge the gap between theory and practice, offering a platform for high-quality research that addresses both contemporary challenges and future trends in these interconnected fields.

The *IJEFBBS* is dedicated to advancing knowledge in economic theory, financial markets, business performance, and the use of statistical methods in analyzing economic and financial data. Through a multidisciplinary approach, we strive to publish impactful research that enriches our understanding of global economic systems, enhances decision-making processes, and supports the development of policies and strategies that foster sustainable growth and stability.

In this first edition, we are proud to present a diverse collection of articles that examine various aspects of economics, finance, and business statistics. From modeling financial risk and analyzing market trends to understanding the economic implications of global events, the papers in this volume highlight the relevance and importance of statistical tools in interpreting and solving complex issues facing today's economies.

We would like to express our deepest gratitude to the authors, reviewers, and editors who have contributed their expertise and commitment to the creation of this journal. Their work ensures that the *IJEFBBS* maintains the highest standards of scholarly excellence and relevance.

We hope that this journal will become a vital resource for researchers, policymakers, financial analysts, and business leaders, fostering a deeper understanding of economic and financial dynamics while promoting innovative statistical applications for decision-making in an increasingly data-driven world.

Happy Reading
